4 MODULE POLE TOP MOUNT

Mount 4 modules with a total area of 100 square feet or less on a 6-inch Schedule-40 or schedule-80 pole

- 85-inch rails per column accommodate 6 modules with widths up to 41.5 inches
- Mounts on user-supplied 6-inch schedule-40 or schedule 80 steel pipe
- Module clamps fit frames between 30 to 40 mm deep*
- No complex sizing documents or need to send module data sheets when ordering
- Heavy-Duty steel structure and Tamarack 3.1 aluminum module mounting rails
- Module Rails attach to 2-inch schedule 80 steel pipe. Purchase this pipe locally to save shipping cost or order appropriate length separately. Use two 10-foot pipes for module up to 78-inches long. Use two 12 foot pipes for modules up to 98-inches long
- 10° to 60° tilt angle
- UPS Shippable in 3 boxes
- **Engineered for up to 160 mph wind speed and up to 200 psf snow load**

The table above shows the maximum snow load for this mount at various wind speed and tilt angles. Larger modules and higher clearance will change maximum wind and snow load.

- Site specific engineering for permit packages is available for an extra fee

*Deeper module frames can be used by adding 50/50+ mounting clamp sold separately 89907

TTP-A-4HW ships *without* 2-inch Schedule 40 pipe - 216 lbs.

PIPE KIT-HD10 - four 2-inch Sch-80 5-foot pipes and 2 couplings. Use with modules up 78-inches long. 104 lbs.

PIPE KIT-HD12 - four 2-inch Sch-80 6 foot pipes and 2 couplings. Use with modules up 98-inches long. 124 lbs.

Pipe Kits above are shipped in 5-foot or 6-foot sections with couplings so they can shipped by UPS.
